

# **Elevator Pitch**

**Ryan McLean (Cerepro, CrC)**

**Are you or someone you know a victim of Cerebral Palsy? Well with the new groundbreaking technology of the Cerebral rerouting Chip (CrC), victims of Cerebral Palsy will be able to have a chip implanted in their brain to reroute enough neurons from all the other lobes to provide enough functionality to the affected lobe and get rid of the symptoms that were caused by the victim's Cerebral Palsy so they can live their life just the way they want without any physical limitations that they may have had.**
